

# Simplifying global tax determination for JD Edwards environments

“9-5 business hours” are a thing of the past. Your business is always on, competing in the market and serving customers. Your global tax determination environment should be, too!

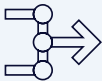

Without a modern solution, global tax determination can be challenging at best and an obstacle to business success at worst.. However, global tax determination doesn't have to be this hard, inconsistent or out of date. Together, Sovos and Circular Edge have teamed up to provide JD Edwards' clients with always-on and always-available tax determination support.

The Sovos certified adapter, powered by Circular Edge, connects JD Edwards ERP to the Sovos Global Tax Determination engine, a key component of the Sovos Compliance Cloud platform. With this adapter, JD Edwards' ERP clients gain seamless and continuous global tax compliance support for every transaction across every jurisdiction, globally.

### Sovos Global Tax Determination Features

Real-time global tax calculation to ensure your business is and stays compliant

A centralized database to easily consolidate your data for accurate tax calculation within a single system

A single platform approach to easily expand to other Sovos tax compliance software as you grow and your business needs change

Optimal cloud performance during peak transactional periods, like Black Friday and Cyber Monday. Flexible deployment options ensure 100% up-time and performance.

Additional functionality includes Use Tax Manager, Exemption Certificate Management, and Sovos Sales and Use Tax Filing
